

XRADAR™ PRE-DESIGN CONCRETE SCANNING

Xradar™ Pre-Design Concrete Scanning has proven especially effective at mitigating risk and adding value to projects, especially tenant improvement projects. It's smart space planning that enables the design team to formulate ideas and evaluate design concepts without the requirement to revisit down the line.

- » Multiple report outputs including AutoCAD and 3D virtual walkthrough
- » Highly detailed as-built drawings that includes the location of all subsurface infrastructure
- » Create design drawings with zero conflicts
- » Avoid redesign costs and delays
- » Explore location remotely

Call now to find out how our Xradar™ Pre-Design Concrete Scanning can save you time and money
